Allergan Aesthetics Unveils SKINVIVE by Juvéderm

An Innovative Skin Booster Injection for a Radiant, Healthy-Looking Skin

Allergan Aesthetics under AbbVie Pharmaceuticals (Thailand) Co.Ltd., a global leader in medical aesthetics from the United States, introduces SKINVIVE by Juvéderm, an innovative treatment specifically designed to boost skin hydration. Ideal as the first step in injectable treatments and perfect for today's beauty enthusiasts, especially millennials and Gen Z, seeking quick, visible results as SKINVIVE by Juvéderm, promises long-lasting hydration for a healthy and radiant appearance.

"Achieving the coveted, dewy glow is a top priority for many, especially millennials and Gen Z. However, not everyone is blessed with naturally radiant skin. While countless advanced technology skincare products promise luminous results, few deliver lasting results. Recognizing this need, Allergan Aesthetics, a global leader in medical aesthetics, developed SKINVIVE by Juvéderm—a cutting-edge injectable skinbooster. This innovative treatment fulfills the desire for healthy, radiant skin that appears lit-from-within," shares Rachana Dungkosintr, the General Manager of Allergan Thailand.

SKINVIVE by Juvéderm is an injectable skin booster approved by both the United States Food and Drug Administration (FDA) and the Thai Food and Drug Administration (Thai FDA). It excels at replenishing skin, filling fine lines, and improving overall skin texture, including boosting hydration and promoting a more supple feel. This is achieved through its unique formulation featuring hyaluronic acid, renowned for its exceptional ability to attract and retain moisture – up to 1,000 times its weight. This ensures effective and long-lasting hydration for the skin.

Further enhancing its efficacy, SKINVIVE by Juvéderm incorporates AQP (Aquaporin-3), a protein vital for maintaining skin hydration. Naturally, innate AQP3 depletes with age, often leading to dryness, replenishing it through SKINVIVE by Juvéderm helps facilitate water and glycerol flow within skin cells. This results in improved moisture balance for a hydrated and healthy appearance.

SKINVIVE by Juvéderm offers long-lasting and deeper hydration through injections administered by a qualified medical professional. The product is delivered directly into the deep dermis to rejuvenate and improve skin from within. Clinical trials have shown that SKINVIVE by Juvéderm significantly improves skin hydration in the cheeks for an extended period. *(Reference: Improvements in satisfaction with skin after treatment*

of facial fine lines with VYC-12 injectable gel: Patient reported outcomes from a prospective study P.1067 – 1068 Patricia Ogilvie MD1 | Marva Safa MD2 | Jonquille Chantrey MD3 | Christophe Leys MD4 | Maurizio Cavallini MD5 | Francois Niforos MD6,2 | René Hopfinger MS7 | AnnMarxMD7) Patients will experience noticeable improvements in skin texture. Additionally, those with persistent pigmentation concerns can also benefit from SKINVIVE by Juvéderm to improve a more even skin tone.

With results lasting up to nine months for enhanced hydration, six months for a brighter complexion and three months for reduced oiliness (*Reference: The study to evaluate the efficacy and safety of using hyaluronic acid type VYC -12L Injection for facial rejuvenates in Thailand. Prof. Dr. Rungsima Wanitphakdeedecha et.al.*), SKINVIVE by Juvéderm caters to three key skin desires and can be used:

- As a skinbooster before needle-based procedures: Thanks to its rapid and sustained hydration, SKINVIVE by Juvéderm complements treatments like Botox or fillers, enhancing their effectiveness in achieving a plumper, more radiant look while contributing to a smoother appearance with reduced wrinkle visibility.
- As an effective solution for dryness or post-laser treatment: SKINVIVE by Juvéderm directly addresses dehydration, making it ideal for individuals with dry skin or those seeking to restore moisture balance after laser treatments that can sometimes dehydrate the skin.
- As a skinbooster for biostimulator treatments: Currently trending, biostimulator treatments stimulate collagen production, often requiring adequate skin hydration beforehand. SKINVIVE by Juvéderm provides the necessary hydration, optimizing treatment outcomes.

SKINVIVE by Juvéderm aligns perfectly with the modern lifestyle, offering a quick, effective treatment with long-lasting results. Your skin will feel revitalized, look healthy and appear more luminous.
