The Latest Injectable Skin Treatment with  
a “Dual Effect – Lift and Firm”

Allergan Aesthetics, under AbbVie Pharmaceuticals (Thailand) Ltd., introduces HArmonyCa™, a cutting-edge injectable skin treatment designed to restore volume to the soft tissues of the face, addressing the need for enhanced facial quality and skin firming.

## What is HArmonyCa™?

HArmonyCa™ is an injectable skin treatment that combines two natural substances: **Hyaluronic Acid (HA)** and **Calcium Hydroxyapatite (CaHA)**. These components work in synergy to replenish the skin, providing a fuller, firmer appearance.

HArmonyCa™ is specifically formulated to restore volume and improve skin quality in the soft tissue areas of the face. It is intended for injection into the lower layers of the skin (sub-dermis) and is ready for use. The product also includes **Lidocaine**, a local anesthetic, to minimize pain during the procedure.

Dual Effect  
Lift and Firm

## How Does HArmonyCa™ Work?

HArmonyCa™ is an injectable treatment that restores volume to the soft tissues of the face. It is carefully designed for injection into the sub-dermis, and the product comes pre-packaged for immediate use, containing **Lidocaine** to reduce discomfort. With a single injection session, noticeable improvements in skin firmness and fullness can be achieved. The duration of the results may vary depending on individual skin type and response.

## Areas Suitable for HArmonyCa™ Injection

- **Cheeks:** To enhance fullness and improve skin firmness.
- **Jawline:** To define and contour the jawline, enhancing the overall facial profile.
- **Chin:** To refine the chin, providing a more balanced and youthful appearance.

## In Summary

HArmonyCa™ is an innovative injectable skin treatment that combines the benefits of Hyaluronic Acid (HA) and Calcium Hydroxyapatite (CaHA), resulting in fuller, firmer skin. This solution offers minimal discomfort and is an effective option for facial rejuvenation and contouring. (It is recommended to consult a specialist prior to injection to ensure the treatment is suitable for your skin type and individual needs.)

Please read the label and instruction manual before use. This product is for professional use only. Results may vary depending on individual conditions.

### Warnings:

- Do not inject *HArmonyCa™* with Lidocaine into blood vessels.
- Do not use *HArmonyCa™* with Lidocaine in areas with inflammation, infection, or tumors.
- Do not over-inject. Over-injection may cause mechanical damage to tissues.

### Contraindications:

- Patients with known allergies to any components of the product.
- Patients with prolonged bleeding or delayed wound healing due to medical conditions or medications.
- Patients with a tendency to form keloid scars, hypertrophic scars, or those prone to skin inflammation.

### Precautions:

- For use by licensed healthcare professionals only, in accordance with the applicable laws of each region.
- For single use and for one patient only. Ensure the product remains free from contamination.
- Do not use if there is evidence of equipment damage (e.g., a cracked syringe, broken syringe cap, or damaged rubber stopper).
